PROJECTS
*ALL projects can be found in my GitHub repository
- **PROJECT 1 [C programming]:** Created Craps and Yahtzee game (Casino based games). It required the use of <stdio.h>, <string.h>&<stdlib.h> libraries and core programming elements like loops, arrays, structs, If & Switch statements.
- **PROJECT 2[C++ Programming]:** Replicated Tetris game with graphics from the SFML library. Attempted to Replicate Spotify Music's Backend.
- **PROJECT 3 [HTML | CSS | JavaScript]:** Created a responsive website using imported stylesheets that were responsible displaying icons and attributes from JavaScript to control the buttons on the webpage.
- **PROJECT 4 [Python]:** Worked on various projects that required me to use in-built data structures like lists, dictionaries, tuples, sets and various libraries to achieve list compiling programs, A battleship game, password encoders and more, e.g., MockBankingSystem.
- **PROJECT 5 [Web Development]:** Developed a portfolio website using HTML, CSS, and JavaScript.
